

Name _____

Date _____

“It’s My Party”

Predict which container I should use for the party. Why?

Record the measurements of each container in the table.

	Estimated Measurement	Actual Measurement
Container A		
Container B		
Container C		
Container D		

Which container should I use to serve my dip? Why?

What previous experience did you use to make your estimate?

How did you estimate which container would be greatest?

How did your estimate and actual differ? How would you change your estimate now?
